Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.	Applicant(s)		
10/664,490	BOYLAN ET AL.		
Examiner	Art Unit		
MICHAEL G. MENDOZA	3734		

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS,

- WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.
- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed
- after SIX (6) MONTHS from the mailing date of this communication.

 If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
 Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any
- earned patent term adjustment. See 37 CFR 1.704(b).

Status			
1)🛛	Responsive to communication	(s) filed on <u>01 February 2010</u> .	
2a)□	This action is FINAL	2b)⊠ This action is non-final	

3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4)⊠ Claim(s) <u>1-5</u> is/are p	ending in the application.
4a) Of the above clair	m(s) is/are withdrawn from consideration.
5) Claim(s) is/are	e allowed.
6)⊠ Claim(s) 1-5 is/are re	ejected.
7) Claim(s) is/are	e objected to

8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9) The specification is objected to by the Examiner.
10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(

12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

a)∏ All	b) Some * c) None of:
1.	Certified copies of the priority documents have been received.
2.	Certified copies of the priority documents have been received in Application No
3.	Copies of the certified copies of the priority documents have been received in this National Stage

application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Arguments

Applicant's arguments, see arguments pages 4-5, filed 2/1/2010, with respect to
the rejection(s) of claim(s) 1-5 under 35 USC 103(a) have been fully considered and are
persuasive. Therefore, the rejection has been withdrawn. However, upon further
consideration, a new ground(s) of rejection is made in view of Huter et al. 6599307 and
Levinson et al. 6277138.

Claim Rejections - 35 USC § 103

- The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- Claim 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huter et al. 6599307 in view of Levinson et al. 6277138.
- 4. As to claims 1-4, Huter et al. teaches an embolic protection device for capturing embolic debris released into a body vessel of a patient, comprising: a shaft member (16) having a distal end, a proximal end and a stop fitting (78); and a filtering assembly rotatably mounted on the shaft member near the distal end thereof, the filtering assembly including an expandable strut (64) assembly and a filter (50) attached to the strut assembly for capturing embolic debris, the filtering assembly being mounted on an outer tubular member (82, 42); a distal spring tip coil (20).

Application/Control Number: 10/664,490

Art Unit: 3734

It should be noted that Huter et al. fails to specifically teach an inner tubular member having a length shorter that the outer tubular member.

- 6. Levinson et al. teaches a device with a common inner tubular member (11, 34) having a length shorter that the outer tubular member for allowing freedom of movement, both radially and longitudinally along the length of a guidewire. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the filter assembly of Huter et al. in view of Levinson et al. to allow freedom of movement. Furthermore, it is well known to place bushings within a device that requires rotation or slidability to provide a low friction surface to allow for rotation or slidability.
- 7. As to claim 3, Levinson et al. teaches a collar (11, 34) within an outer tubular member (24, 26) at each end of a filter assembly. The modification to Huter et al. would put a collar at end of the filter of Huter at 82 and 42. The collar at 82 would abut with stop 76 and therefore read on the limitation of a second stop fitting (76) in abutting relationship with the proximal ends of the outer and inner tubular members.
- 8. As to claim 5, Huter et al. teaches the embolic protection device of claim 2 except for wherein the outer and inner tubular members are made from polyimide. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use polyimide, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. In re Leshin, 125 USPQ 416.

Art Unit: 3734

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to MICHAEL G. MENDOZA whose telephone number is

(571)272-4698. The examiner can normally be reached on Mon.-Fri. 9:00 a.m. - 5:00

p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Todd Manahan can be reached on (571) 272-4713. The fax phone number

for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
